

# I 6 CAPPELLI PER PENSARE di Edward De Bono

**BIANCO:** ASSENZA di colore...

Neutralità, dati, numeri, fatti, informazioni

**ROSSO:** come la PASSIONE ...

Emozioni, sensazioni, premonizioni, intuizioni

**NERO:** come la TEMPESTA ...

Aspetti negativi, rischi, problemi

**GIALLO:** come il SOLE ...

Aspetti positivi, atteggiamenti costruttivi, occasioni

**VERDE:** come l'ERBA ...

Fertilità del pensiero, nuove idee, creatività

**BLU:** come il CIELO che tutto sovrasta ...

Supervisione, controllo, direzione

## Piccoli cenni:

Ognuno di noi tende a pensare nello stesso modo, e trova difficoltà ad assumere altri modi: il pessimista pensa in nero, l'ottimista in rosa, l'emotivo in rosso, il razionale in bianco. Edward De Bono, padre del "pensiero laterale", nel 1985 ha proposto un originale e fortunatissimo metodo per abituarsi a pensare con sei modalità diverse.

Ogni modalità è stata equiparata ad un cappello che si mette e si toglie al bisogno.
